Get organised™

1 CHOOSE YOUR STORAGE

Build Your Ultimate Tool Kit by combining the wide range of storage options with the extensive range of tool tray sets. We have become the preferred choice of key industrial users and top motor racing teams who recognise that organisation is key to efficiency and success.

TYPICALLY TENG FEATURES:

All of our tool storage is manufactured from heavy gauge, top quality steel. They are built to last!

During the manufacturing process our tool storage is powder coat painted with a 5-step rust prevention and undercoat.

Comfort grip handles. Our top & middle boxes are supplied with rubber coated side handles while standard roller cabinets are equipped with rubber soft grip transport handles.

Standard cabinets are fitted with 5" castor wheels covered with high-quality rubber. Two fixed and two swivel with brakes. Fitted in a U-shaped bracket providing extra strength and stability.

All drawers are equipped with robust 3-step ball bearing slides allowing them to be fully extended easily to gain greater access to the tools.

Safety function that only allows a single drawer to be opened at a time to avoid a tool box tipping over.

Improved combination locking system for extra security on most of our tool boxes and roller cabinets.

A selection of tool boxes in our range are supplied with a key lock.

EXTRA WIDE ROLLER CABINET

2 CHOOSE YOUR TOOL TRAYS

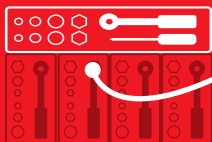

Don't waste space with tools you don't need!
All tools are developed to fit the Get Organised
system so you can fill your storage with a
selection of tools to suit your exact needs

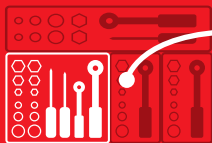

HOW DO THE TRAYS FIT IN A STANDARD CABINET DRAWER?

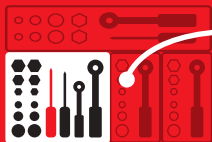

TT TRAY - The single tool tray that
you can click together in a row
of 4 in a standard roller cabinet
drawer or a tool box drawer

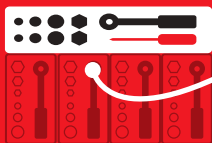

TTX TRAY - The long tool tray that
fits neatly at the back of a roller
cabinet drawer or the full width of a
tool box drawer

TTD TRAY - This tray takes
up the space of two TT
Trays and fits neatly into
all of our storage solutions

TED TRAY - This tray takes up
the space of two TT Trays and
is supplied in EVA foam. Look
out for the EVA icon:

TEX TRAY - The long tool tray that
fits neatly at the back of a roller
cabinet drawer and is supplied in
EVA foam

THE
Girl
ON A
BIKE
PROJECT

ACHIEVING THINGS I DIDN'T REALISE WERE WITHIN MY REACHES

FROM **TRAGEDY** TO **POSITIVITY**,
VANESSA RUCK HAS
OVERCOME SO MUCH AND IS
NOW EMPOWERING PEOPLE
TO GET THEIR HANDS DIRTY
AND HIT THE ROAD!

➔ Born and raised in England. I'm a go-getter, a chase-your-dreams kind of girl. I grew up in the great outdoors, getting muddy and messing around keeping fit with horses and quad-bikes and always up to mischief.

But things took a life-changing turn on the 25th of March 2014. I was on my bicycle with the fresh feeling of spring in my stride and hit the road pedaling hard! Out of nowhere an oncoming car pulled across in front of me. I had a microsecond. Time seemed to go into slow motion. But there was nothing I could do. There was no route for avoidance. No hope to avoid impact. I felt my body crumple as I shattered into the rear passenger panel. My right shoulder took the full impact. My body screamed internally before collapsing to the ground on my right side.

I was feeling incredibly shaken up, as one would expect but my get-up-and-go attitude had me staying positive about the short-term implications.

Today, years since the accident; my body has been through so much. Over 13 months off work, 6 operations, full shoulder reconstruction [yes I am now partly bionic], 4 hip surgeries, countless steroid injections, hydrotherapy, osteopath, shock

wave treatment, acupuncture, red light therapy, spiritual healing, ice treatment, months and months of physiotherapy, and continued hip treatment.

My escapism has always been through sports, whether that's kite surfing, snowboarding or mountain biking, it's always been about getting physical, but the accident changed that, but then motorbikes came into my world. They've swiftly become my favourite form of adventure; the open road, the power, the ability to simply disappear into the unknown and travel the world. Some may wonder how I've been able to ride motorcycles during my recovery, given the injuries. But most of the people who ask are those who don't ride!

I started @TheGirlOnABike when bed bound after my 3rd surgery following the accident, I needed something positive to channel my energy into. Since this day I have continued to share the ups and downs of my journey. Now as I discover new DIY techniques for my bike, I'm planning to help empower others to give it a go too, showing them that if someone like me can do it, they can do it too! I want to give people the confidence to get some tools, get their hands dirty and get working on their motorcycles. For me, DIY completely opens up new areas of knowledge, helping me learn and achieve things I didn't realise were within my reaches.

I am passionate about so many things, but motorbikes are now so central to everything. There are few things as satisfying as a hard day's graft working on your bike and seeing the results on the road. When I think of hand tools, I think Teng Tools! The tools are awesome, and I know I can rely on them to help me get the job done. Working on my motorcycle, my pride and joy, I only want to use the best. For me that is Teng Tools.

- C Clamp power grip pliers
- Swivel pad clamps
- Length 18" / 450mm

Item ID: 418SP

Article Number: 275290104

BITS DRIVERS

COME AND HAVE A GO IF YOU THINK YOU'RE HARD ENOUGH!

Unlike other brands the Teng Tools screwdriver blade has steel alloy wings that the plastic handle is moulded around. This allows for greater torque to be put on the screwdriver, ensures the blade is dead straight and stops the blade from moving in the handle.

The bi-material handle is designed for increased comfort and smooth action preventing blisters after continuous use. It gives better support and increased power transfer. The red resistant plastic is used for the core and ensures the blade is held securely and the soft black material prevents the screwdriver from sticking in the hand allowing for rapid movement.

The blades and tips are manufactured from our TT-MV+ steel alloy material. This makes our screwdriver shafts ultra hard but also flexible. The precisely cut TT-MV+ steel alloy tips creates a sharp-edged surface that grips the fastening without slipping.

SCREWDRIVER SET

11

Pieces

- TT-MV PLUS steel blades for added torque
- Ergonomically designed bi-material handles

Item ID: MD911N

Article Number: 269950101

WHAT TYPE OF HANDLE DO I NEED?

The larger type of handle allows for more power and force to be executed with the driver.

The smaller type of handle make it easier to work quickly as less force is required with the driver.

Always use the right type of screwdriver for the fastening you need to turn!
